Mutual fund investing involves risk. Principal loss is possible. Since the Adviser considers other factors in addition to traditional investment criteria when selecting portfolio securities, it may forego a profitable investment opportunity or sell a security when it may be disadvantageous to do so. Investments in small- and mid-cap companies involve additional risks such as limited liquidity and greater volatility.

¹Expense ratios above are as December 31, 2015, the Fund's prior fiscal year end, as reported in the Fund's current prospectus. Investment performance reflects fee waivers in effect. In the absence of such waivers, total return would be reduced. Investment performance for the last quarter is based upon the net expense ratio.
